RAYMOND HIGH WINS TWO IN ROW

LOCAL HIGH WINS—52-16

The opening game here of the High School League took place Friday night last in the High School Gym. when Raymond played host to the Lethbridge Collegiate team from Leth. There was a good crowd present for the opening game and the High School Student body were there in force with their yells, songs etc., cheering the local squad on.

It was fast ball from the opening whistle to the last one and the fans never had any dull moments. The visitors were certainly fine sport and despite the fact that they were playing a losing game most of the way, they played good clean ball and worked all the time. Never a disagreement or quibble during the hours play and the visitors won a great hand from the fans.

The home team had the advantage of their own floor and the crowd with them, and they were showing great speed all the way. Snow, Galbraith and Card were the outstanding scorers of the home team, Snow getting 21 points, Card 14 a the second half and Galbraith 8 in the first half. The boys were playing a combination that Lethbridge couldn't solve, and while a number of fouls were charged up there was no dirty playing intentionally on either side.

The players were as follows:—Lethbridge—Corenblum, r.f.; Hishop, l.f.; Russell, c.; Ostlund, r.g.; Hamilton l.g.; Goodman, Shields, Levitt, subs.

Raymond—Webster and Nalder, r.f.; Snow, l.f.; Galbraith, Card, c.; VanOrman Walker r.g.; Hague, Kling, l.g.

Frank Weaver and Earl Zemp head led the game to the satisfaction of everyone, and very little got by them.

THE PRELIMINARY

The preliminary game was between the second team of the Lethbridge Collegiate and the Raymond High. Here again Raymond was successful winning by 37-24. The game was full of interest but the boys could not stand the grilling like the first team and didn't have the speed either. Both games were played with a 2 minute rest between quarters.

RAYMOND HIGH WINS AGAIN

Raymond had a Basketball night here Wednesday when the Magrath High met Raymond's High in a League fixture.

The first preliminary of the evening was between Ray Aggies and the High School 2nd team resulting in a win for the Aggies by a 37-15 score. The advantage of weight and height that the A. C. boys had over the High gave them an easy victory.

Then the girls of Magrath High and Raymond High furnished amusement in a game featured by close checking, lots of tackling and plenty of action. The visiting girls surely worked hard and shot quite often, but they failed to bulge the net while Raymond scored 23 points.

The hall was in an uproar when the High School teams came in, and with Raymond's Student body on one side of the hall and Magrath delegation on the other side the yells floated back and forth across the hall and everyone was almost deafened.

Earl Zemp and Frank Weaver had the whistles and they were running all the time to watch the play. Speed was the outstanding feature of the game and thru all four quarters the ball was travelling at lightning speed.

The local lineup was changed entirely at the end of the first half and with three fresh men on the visitors lineup the pace was kept up.

Magrath brought a strong crowd of rooters and a big Raymond crowd was in attendance, despite the cold weather.

The lineup was as follows:—

Magrath:—W. Matkin, 8, R. Bing ham, r.f.; F. Turner, 4, l.f.; L. Meldru 3, c.; J. Wolsey, 3 R. Gibb, r.g.; E. Evans, M. Sabey l.g. Points—18.

Raymond:—G. Snow, 5 G. Kirkham, 5 r.f.; W. Webster, 8 U. Nalder, 2 l.f.; B. Card, 6; B. Galbraith, c; W. Van Orman S. Kling, r.g.; K. Hague, H. Walker 4 l.g.—Points 31.

The game was enthusiastic from

Regular Monthly Board of Trade Meeting

Raymond Students Win Honors

Two students of the Raymond High School in grade XI, have won honors in Departmental Examinations for the year 1928-29. They are Alice Litchfield, who in spite of quarantine, and the necessity of a private examiner, made her grade with honors, and Wayne Wooley, who has taken 4 grades in 3 years and in his exams last June made 100 p.c. on two papers one of which was Grade X Literature, on which 40 p.c. of the students in the province failed.

In 1928 Kate Allred and Arminto Earl won honors in their Finals, the first pupils in the history of Raymond High School to accomplish this. These reports speak well for the labors of Principal Blenckner and his staff, and they are certainly worthy of praise. It also shows that the work is effective where High School is taken seriously and the students do their part during the entire year instead of a few months plugging at the end of the school year.

John Powelson returned Saturday night after spending the holidays in Salt Lake with relatives.

Don't forget the Basketball games at the Opera House tonight. The Jack and Cardston Maple Leaf, and our Intermediate and Magrath. Lets help the boys keep up their winning streak.

DID YOU EVER STOP TO THINK

Edson R. Waite

Sir Henry W. Thornton, Chairman and President of the Canadian National Railways, says:

That the human element is by far the most important element in a railroad, as it is in any great industry. Motive power, materials, time without them a railroad could never run, but what could it do without men, even in these days when machines are developed to such a high state of efficiency?

The value of man power has not always been realized in industry. But if anyone asked me what I considered to be the reason for the success of the Canadian National Railways, I should say that it was paying attention to the human element, the general public and to the man power of the system itself.

In 1922 Canada had 22,000 miles of railway which physically as well as financially were running deep into the red figures. The war had left Canada low. It was a young country and it had suffered grievously. It was sound economically, but it was depressed and it was depressed. It had small confidence in the over-expanded 22,000 miles of railways that were to become the National System.

The first task was not only to reorganize units at variance with one another into a great railway system, but, in a spirit of good humor and faith, to preach confidence.

The chief task was to excite a spirit of confidence and pride in the enterprise amongst men and women who work in offices, shops and stations along the lines of the railway, to take stock of man power and co-ordinate it into a human but efficient and smooth-running organization.

The Canadian National Railways System is successful because the public believes in it and because every member of the staff, no matter how small his part, realizes and believes in the goods he has to sell.

Railways may make or break a country, and Railways are not only Locomotives and steel rails but men.

start to finish and two good teams were at it hammer and tongs for a full hour's playing. Come again Magrath.

The regular monthly Board of Trade meeting was held at the Club Cafe on Wednesday at 4:30 p.m. with Pres. T. O. King in the chair and 29 members and visitors present.

Following the regular delicious luncheon served by the management, the Board entered into the business of the meeting.

I. B. Roberts on behalf of the Raymond Beet Growers, was present and presented the prizes to the five winners of the Junior Sugar Beet Competition for the Raymond district as follows:

First prize to Miss Beth Christensen with a total of \$25.00 points who received a cash prize of \$25.00 and who also qualified for the third prize in the general competition sponsored by the Alberta Department of Agriculture and the Lethbridge Board of Trade.

Second prize was won by Miss Byrde Mendenhall who had a total of 170 points and received \$20.00.

Third prize went to Smalle Redd with 22.96 points, and he received \$15.00. While Litchfield Wood won fourth prize with 22.63 points and received \$10.00. These two boys tied their beads at Velling and pedaled their bicycles out there and back to do nothing, etc.

Fifth prize was won by Ruth Evans with 22.60 points, who received a \$5.00 prize.

These prizes were given by the Alberta Department of Agriculture the Raymond Beet Growers Association and the Raymond Board of Trade. They were judged on: Stand 20 points; Weight, 40 points; Shape 10 points; Appearance 10 and Effort 20.

J. R. Bennett then spoke briefly of the certainty of oil and gas in the district, and of his desire to get a company organized to benefit the people, and he had invited Mr. Kinch, whom he then introduced to come and talk to the members.

Mr. Kinch said that there was a oil company south of Lethbridge and he felt sure that there was oil in the immediate district because we had oil and gas all around us. His idea was to get acreage in a proven field first, get a producer there and in this way get established and then come back and develop local fields. If a company was organized it may be the means of getting an exploration contract on some acreage now held by

big companies. He was willing to lend his assistance if the problem of organizing were discussed. It was suggested that a meeting be called of those interested and the subject was dropped there.

Deed Mendenhall, representing the Raymond Flying Club was present and asked the Board of Trade to set aside funds to build a hangar for the two Government planes which were promised, said hangar to cost approximately \$300. This brought about a great many questions as to membership costs, advantages, etc., all of which were satisfactorily answered by Mr. Mendenhall. It was decided to refer the matter of the hangar to the Committee who had been working on a landing field, viz., W. D. Mendenhall, F. R. Taylor and Geo. Brewerton.

Sec. Halpin read a letter from the Canadian Utilities Re Radio Interference and a motion was passed to write the Dept. of Marine and Fisheries to try and get immediate action on this matter.

A letter was read inviting the local Board of Trade to become a member of the International Chamber of Commerce and it was decided to refer the matter to the new Executive.

A committee consisting of T. Geo. Wood, W. A. Redd and S. I. Mey was appointed to submit a resolution to the U.E.A. Convention pointing out the reasons why the School of Agriculture should be kept here. The same committee was also asked to endeavor to have Hon. Geo. Bondy visit the A. C. here while in operation.

The long question came in for considerable discussion, with a motion being passed to unite forces with the Board of Trade Road Committee, the Magrath Board of Trade and the Municipal Councils to get a decision from the Highways Dept. regarding the Lethbridge, Cardston Highway via Raymond and Magrath.

Adjournment at 4:10 until Feb. Those present were: T. O. King, T. L. Halpin, C. O. Asplund, C. R. Wing, I. B. Roberts, T. T. Mendenhall, F. R. Taylor, J. R. Bennett, M. Kinch, W. A. Redd, J. W. Evans, T. Geo. Wood, D. E. Easom, D. Mendenhall, H. F. Hodge, L. D. King, H. Allen, A. J. Walton, Dr. Leech, O. S. Longman, L. L. Paek, C. W. Lamb, Jas. Meeks, Wm. Wilde, E. J. Farver, J. E. Maudsley, W. C. Stone, S. S. Rait and S. I. Mey.

ALL SET FOR BIG BOXING BOUT

CANADA IS LARGEST RADIO CUSTOMER

Washington, D. C. Jan. 15, 30 (Special to the Recorder) Electrical apparatus from the United States, particularly radio equipment and electric refrigerators, shows continued gains in foreign markets, particularly in Canada, and October shipments reached their highest peak since 1921, according to a statement recently issued by the Department of Commerce.

Foreign shipments of electrical apparatus from the United States for the month of October, 1929, amounted to \$14,919,994, a gain of 4,008,370 compared with the same month last year, according to preliminary figures just issued by the electrical division.

The value of exports of such equipments for the 10 month's period ending October 31, 1929, reached \$123,583,581 against \$89,622,297 for the corresponding period last year. Throughout the year radio apparatus and electric refrigerators have steadily continued to find increasing foreign markets and these two commodities have accounted for the largest individual gains. There was an increase of 100 p.c. in the export of radio apparatus as compared with the corresponding period of last year.

Canada was the largest purchaser of receiving sets with Mexico next. Canada was also the most important purchaser of radio receiving components and the value of such purchases amounted to \$615,285.

Exports of refrigerators to Canada during this period amounted to \$115,622.

HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION

STUTTERING AND STAMMERING

Speech is the medium of human intercourse. In order to succeed in life, we require to give an account of ourselves, to express our thoughts and our ideas clearly. It is through a straightforward, normal, standard speech that we sell our services to others. Desirable as it is that speech be free from errors in grammar and that it command a good choice of words, it is much more important that it be unhampered by such defects as stuttering and stammering.

About the fourth day of life, the child begins to hear; at the end of the first month he recognizes sounds. He imitates sounds at the end of the third month. At the beginning, his babbling sounds which are generally incomprehensible, although the fond parents and relatives may find a meaning in them, which is not really there. During the child's second year, words are used correctly by him, and the third year he has joined words to form phrases.

Normal speech is a gradual, desirable habit to acquire and is the product of proper training. Like most habits, that must be overcome and the longer it is allowed to continue, the more firmly it is fixed and the more difficult it is to overcome and replace with the correct and desirable habit.

When the baby talks to a baby, he talks correctly and distinctly. When a baby talks to a baby, he talks correctly, but it is a defective speech which may become ingrained as a habit, and, if allowed to persist into adult years, it is far from being desirable.

The child who is emotional or what is called "nervous" is apt to stutter particularly if he plays with a child who stutters.

It is far from being desirable. It is not to be mimicked or laughed at. Have the child speak slowly and deliberately so that he will gain confidence in his ability to speak properly. The whole life of the child should be made easy and easy. The important point in the prevention of speech defects is always to speak slowly and correctly to the baby, and correcting defects in speech before they become habits. Correct speech is chiefly the result of imitation, and parents should realize their responsibilities in this respect.

Everything is all set for the Boxing Bouts on Saturday night Jan. 18, in the Opera House, and we are assured by those who are in position to know that it will be a real evening of boxing.

The headliner between Kesler and Shelton promises 10 round of hard hitting, speed and scrapping. Kesler has been working out every day and declares he was never in better condition or felt more like fighting. Shelton arrived Thursday and looks to be in the best of condition with a wallop in either hand. There is no question but that there will be something doing when these two get together in the roped arena.

The semi windup between McKenzie and McCoy of Lethbridge who tip the scales at around 150, will be six rounds of battle and this also will be worth the price of admission. Both these boys claim to be the best and the answer will probably be given Saturday night.

Then Frank Little of Stirling and Nick Richards will mix it for 4 rounds and these two have been here all week with Kesler and will show some real stuff. Young Stanmore will go four rounds with an opponent yet to be named, and to add local interest, there will be four rounds between a couple of local pugilists.

Jimmy Burrell and Billy Drain will box an exhibition and these are two of the most evenly-matched boys you ever saw. They exchange wallop for wallop and are bears for punishment both of them.

How does that sound to you for a card. If you are a lover of good clean, manly sport and the art of self-defence, this card should be very attractive to you.

The first sale has been very satisfactory and everything points to a good record for the sale. L. I. Fly the Recorder has spent most of the week here looking after the numerous details and now everything is all ready, and we are told that no one need be afraid of being "freed" as this whole card is guaranteed and you will see action aplenty in every number.

Now don't forget the date, the place and the time. Sat., Jan. 18 1930 at the Raymond Opera House commencing at 8 p. Seldom does a small town draw a card of this calibre. Be There.

EDITORIAL NOTES

A unusual method of advertising their Province to the youth of the mother country has been adopted by the Ontario Government in a bulletin which is widely circulated among the schools and business firms of Great Britain are published enthusiastic accounts of life and work in Ontario written by the young people who have recently found homes and occupations throughout the Province. It is anticipated that these first-hand impressions of new settlers in Canada will prove effective in attracting to Ontario a desirable class of ambitious young men, eager to work and grow up with the great farming and industrial enterprise of that Province.

There is majesty in the thunder of a waterfall, and something more now mankind is turning the falling floods to its advantage. Not only the United States and Canada, but New Zealand and Australia are spending millions in hydroelectric development. Is there any less majesty in the myriad lights that blaze, and the wheels that hum by the leashed might of water that once went to waste?

The simple and expeditious sometimes excel the complicated and technical, as the captain of a salvage ship learned recently. For he found that native divers near Calcutta by the aid of common ropes had already picked up the \$40,000 cargo he had come with elaborate equipment to salvage from the bottom of the ocean.

Edison advises keeping the Government out of business. This does not mean, however, that the Government should not constantly strive to become more businesslike.—Christian Science Monitor.

"Play it with apples," Canadian Pacific Express Company slogan for the sending of gifts by Canadians to friends in Great Britain and Europe, is being extended from Christmas and New Year presents to gifts sent at all times of the year. With the present bumper apple crop of Canada, the fruit can be bought at a reasonable price and its quality is of the highest. If sent overseas before the close of navigation on the St. Lawrence, cost will be considerably reduced.

Over 200 officers and men of the 4th Canadian Mounted Rifles first mounted regiment, formed in Toronto at the outbreak of the Great War, is holding its first reunion since the war at the Royal York Hotel, Toronto, November 29 next. The unit is proud of the fact that it still has in its ranks T. Holmes of Toronto, youngest Victoria Cross holder in Canada who captured an enemy machine gun nest singlehanded at Passchendaele.

An apple tree, over a hundred years old, remarkable for its symmetry and having this year produced 22 barrels of Calkin Pippin apples, is attracting much attention in the orchard of Downey Morton, Lakeville, King's County, Nova Scotia. Mr. Morton picked apples from the same tree 55 years ago and it was then a fully grown tree. Today he believes it to be well over the century mark.

The arrangement existing between the Canadian Pacific Railway and the Government of Nova Scotia with regard to English immigration which has proved mutually satisfactory, will be continued for the coming year, is the recent announcement of L. B. Fraser, secretary to Premier Rhodes.

Superior grazing conditions in British Columbia are given as the reason for a shipment of 3600 grade Ramboulet ewes and rams, from Montana recently made to the Vancouver Live Stock Exchange for distribution to sheep raisers in the Kamloops and Cariboo districts of British Columbia.

The farm of Gustav Elbert of Wetaskiwin that won the trophy recently offered by the Edmonton Board of Trade for the best field of wheat in the northern half of the province of Alberta as well as the cup donated by the Alberta Government for the best farm in Alberta, has yielded 45 bushels to the acre on a 100-acre field and graded No. 1 hard. Elbert is another farmer who came to Canada without capital and has made a striking success.

The British Family Re-Union Association has just been created by the Canadian Pacific department of Colonization and Development — backed by influential organizations, groups and individuals — to promote increased British settlement in Canada. It will particularly benefit heads of families in Canada desiring of having their wives and families join them in the Dominion, and others, established on this side wishing to help relatives or friends overseas to come to the Dominion for permanent residence.

FAT OR FASHIONABLE

A girl 21 years of age was admitted to a Sanatorium a few days ago. She was a member of a large family noted for their robust health and longevity. This girl was one of seven women patients all under 25 years of age who have come under the care of a chest specialist during the last three months, and the medical history of one was, with a few variations, the medical history of them all: No fat, no sugar, no dandies, (in one instance no breakfast) light lunch, and dinner consisting mostly of lettuce, fruit, or vegetables. This diet combined with working hard and playing hard deprived the body of all power to resist disease.

There was no energy in reserve to fight infection. A bad cold that would not be shaken off, a nasty little cough especially first thing in the morning, a marked lack of energy accompanied with an irritable temper, and the infection, getting every encouragement, developed into active disease. A young life crippled and sorrow and worry turn companions of prolonged sickness brought to the home, and all because my young lady must be fashionably thin. And yet women believe herself an intelligent, thinkink being!

Literature on foods and food values can be had free from The Canadian Red Cross Society, 406 Civic Block, Edmonton.

Pres. H. S. Allen returned from Salt Lake City early this week after spending the holidays there.

Big Ice Carnival January 31st. Watch for dates.

History was made in Canada when Chief Bimbatow Wahwahkalehe (Running Deer), of the Ojibways, met and greeted in all friendliness Chief Oscanonto (Deer) of the Iroquois, at Caughnawaga Indian Reserve, near Montreal, recently. There is no record of these tribes ever having met before in Canadian history. The Ojibway Chief is better known as Paul Cameron, head Indian guide for the past thirty years at Nipigon Camp, northern Ontario. Neither could speak a word of the other's language and conversed through the medium of English.

Judges of the annual fishing contests held at French River, Nipigon and Devil's Gap (Lake of the Woods) bungalow camps, have announced the winners as follows:— W. H. Graf, of New York, and Frank S. Slosson, of Chicago, tied for the trophy at French River with a 30-lb. muscalonge each; J. H. Lunn, of Hammond, Ind., won the Nipigon trophy with a 74-lb. speckled trout, closely followed by Mrs. Dundy, of Kansas City, with a 7-pounder; and A. R. Joslin, Jr., of Cincinnati, took the Devil's Gap trophy with a bass weighing 3 pounds, nine ounces.

"The destinies of Canada and Japan lie together in the great Pacific Ocean," declared Hon. Iyemasa Tokugawa, K.C.V.O., first minister to represent the Emperor of Japan, when he reached Dominion soil here with the arrival of the Canadian Pacific liner Empress of France, at Vancouver recently. He was accompanied by Togo Fukuma, Japanese Consul-General, both of them being on their way to Ottawa, where the former later delivered his credentials.

What is regarded as a record movement was made recently at the Saskatchewan Wheat Pool Elevator No. 7 at Port Arthur, when in 4½ hours, 550,000 bushels of wheat were transferred from the elevator to the hold of the steamship Le-moyne. There were periods during the loading of the ship when the wheat was carried like a torrential golden river from the elevator at the rate of 2,666½ bushels per minute.

Fifty different steamship lines now serve to carry Canadian products to every continent from the port of Vancouver, states a recent trade review issued by the Royal Bank of Canada. The review adds that in a period when the other great ports have had difficulty in maintaining their pre-war volume of trade, traffic through the port of Vancouver has experienced steady growth. From 122 ocean-going ships in 1913, the number increased to 1,344 in 1928. During the past year total trade of the port had a value of \$260,000,000.

The largest sugar beet crop on record in Southern Alberta is being harvested in the Raymond district, centre of the industry. About 8,500 acres were sown to sugar beets this year, 2,000 more than in 1928, and the crop will on estimate yield about 65,000 tons or 23,000 above last year's production.

Cable advices from London state that Captain Ronald Stuart, V.C., D.S.O., U.S.N.C., R.N.R., commander of the Canadian Pacific liner "Duchess of York," has been officially selected to attend the Armistice Day ceremonies at the Cenotaph in London. Captain Stuart is one of the youngest liner captains on the North Atlantic and the only passenger ship captain to wear the Victoria Cross. It is expected that he will also be present at the Prince of Wales' dinner to V.C.s.

IMPORTS ARE PAID FOR BY
EXPORTS

Sometime ago R. H. Webb, Mayor of Winnipeg, made the statement that Canadian people were unpatriotic because they purchased so much abroad instead of buying at home. He also would decrease if imports were curtailed that unemployment in Canada tailed.

The exact opposite is the case—a decrease in imports would reduce employment. There is always less unemployment when imports are heavy than when imports decline. This is so certain that the temporary exceptions serve only to prove the rule. Patriotism is shown therefore by buying always where we can secure the best values. No other rule of conduct applies.

The whole subject is very interesting. I have written a little booklet on the question and will be glad to send any reader of this paper a copy free of charge. There is of course no obligation attached to this. Simply send a post card addressed to R. J. Deachman, Box 844, Ottawa and I will be glad to send you a copy.

PHANTOM "ESTATES" STILL FLEECE THE PUBLIC

Ottawa, Jan. 9 (Special to the Recorder) A warning to Canadians and Americans invited to speculate in "estate" claims in "The Bank of England" or "in chancery" has been issued.

These claims, the warning states, are in all cases non-existent. Despite this fact some 200 to 300 letters are received every year inquiring about these "fantastic fortunes or estates."

The warning is issued on the basis of report sent to the American Consul General in London, Albert Halstead. The announcement follows:—

The Department of State has been informed that the vast fortunes or unclaimed estates believed to be "in chancery" or in "The Bank of England" awaiting disposition to heirs, are in fact, non-existent. Among such may be mentioned the so-called "Sir Francis Drake Estate," the "Blake Millions," the "Jennens Estate," the "Townley Estate," the "Bradford Estate" the "Hedges Estate" and other fantastic fortunes or estates in England to which numerous credulous persons in United States and Canada are reported to have made contributions in money to various organizations or agents, either in this country or in England, in the hope of sharing in the distribution thereof. Before contributing to such schemes definite information should be obtained by those who believed themselves to be heirs.

IT'S THE MONEY YOU SPEND WISELY THAT COUNTS

Someone has said that a rich man has more fun keeping a budget than a man of moderate means. Because the money he saves is tangible, he can see it, use it, and put it to work. Be that as it may, a budget is an invaluable help to anyone.

A budget helps you keep the right proportions between expenses, prevents you from spending more than is best for food and rent, or crimping more than you should on entertainment and luxury. But a budget is not a reason for getting cheap things, things in which you forfeit quality by attempting to save on price. A budget says to you: Here is the amount of money you should spend for this. Spend all of it, but don't spend more. And it is up to you to get the best that can be got for that amount.

The person who spends his money wisely who likes to get the utmost for it, always finds out from advertisements how he can spend it to the best advantage.

It is surprising how much better you can buy if you make it a habit to read advertising. A little more value here... a little better workmanship there... in this thing slightly more durability... that product perhaps a bit finer. And every cent of money you spend for advertised merchandise will bring you greater comfort, a higher quality of goods, and a standard of excellence that is nationally recognized.

It certainly pays to read the advertisements

News Notes

Two league basketball games tonight. Senior and Intermediate. 50c and 25c for both games. Opera House 8 p.m. here.

King Motors came nearly being the scene of a disastrous fire last Friday afternoon. A car was driven in frozen hp, and when the blow torch was applied the gas and oil on the outside of the engine ignited and the entire front of the car was aflame. A liquid fire extinguisher was handy and when this was thrown into the flames and burst the fire was snuffed out almost at once. The garage was full of cars and the fire would have been very disastrous if it had gotten away.

ANOTHER TRAINLOAD SHIPMENT

Who says that Canadian farmers are not prosperous? The very evident prosperity of Canadian farmers is attested to by the fact that a full trainload of Oliver Hart-Parr tractors was shipped the latter part of December from the Charles City, Iowa tractor plant of the Oliver Farm Equipment Company enroute to Alberta dealers who have ordered them. A trainload tractor shipment so early in the year denotes many things. First, the faith of Canadian implement dealers in the agricultural future of this territory; second, faith of the manufacturers who so early in the season have built up a large number of tractors in full confidence that they will be disposed of; and, third, a trainload shipment of tractors is mighty good evidence that Canadian farmers generally are progressive and are determined to cut their farm costs through the use of better farm equipment.

Dealer C. H. Elder of Raymond will receive two carloads of tractors from this trainload shipment. They will be on display at his place of business and he extends a cordial invitation to farmers who are interested in increasing profits and cutting operating costs to come in and look them over.

DON'T OVER FEED FOX PUPS

Overfeeding is the direct cause of a large percentage of deaths among pup foxes, and is a common factor in producing rickets. Pups should only be fed what they will quickly clean up in a few minutes, and any indifference displayed towards feed is a warning sign to cut down the ration. Pups should be looking for their feed at every meal, and show much interest at the approach of the attendant at feeding time.

The mineral and vitamin deficiency is overcome if a proper diet is fed consisting of eggs raw meat, vegetables and small quantities of milk, cereals and ground bone.

Once the pups are separated from the mother they should spend a part of their time in the sunshine, and shy nervous foxes should be shut out of the kennels in the day time. The ideal ranch should be constructed so that the fox is provided with both shade and sunshine at some period of the day.—Market Examiner.

Notes from the A.C.

This past week has been a very busy and exciting one at the R. S. A. School gongs, Basketball whistles, and fire sirens have been intermingled and still the school goes on.

Last Friday evening the basketball team journeyed to Lethbridge and played the Deuces but were unfortunate on being on the short end of 43-31 score. However, the boys did real well considering the training they've had, and we are confident in winning or division of the league at the least.

Last Thursday afternoon the livestock pavilion was the scene of a fire, a real fire, mind you with fire extinguishers, town fire brigade and everything, and we might add, fifty or sixty spectators as well. It seems that a spark from the stove landed in an old sparrows nest where all the trouble started. Prompt action on the part of Mr. Asplund and students however, saved the situation. Some of the boys were expert in throwing wet snowballs.

The R.S.A. basketball team play Taber next Wed. January 22nd This is a home game, and all the Aggies in Raymond will be out to root for the Crimson and Gold.

The Aggies have participated in two hockey games during the week and divided the honors, in the first game we lost 4-2, but the second contest was ours by the score 2-1.

News Notes

Archie Witbeck was in Lethbridge on Saturday.

It has been cold so long we have nearly forgotten when the last warm day occurred.

Chas. Fawns has been ill for a number of days with bronchitis.

The Annual Ratepayers Meeting will be held the last Friday of this month. Watch for date and be there.

Mrs. Reg. Cooper was in Cardston this week attending the funeral of Mrs. Gay Nelson, to whom she is related.

Mr. and Mrs. H. S. Taylor and Mr. and Mrs. Ross R. May were in Raymond Sunday. Mr. Taylor coming over to attend the meeting of the Flying Club.

There has been much said recently by the Daily Press about the waste gas in Turner Valley. It is estimated now that the waste is ONLY \$100,000 a day. Why couldn't even this SMALL sum be saved.

TO THE MUNICIPAL COUNCILS OF ALBERTA

The Provincial Department of Agriculture wishes to draw to your attention that a number of Field Supervisors have been appointed to commence work on January 27th. for a period of one month. These men will endeavor to visit all councils in the province with a view to stimulating more interest in Weed Control. They will also be prepared to hold special meetings from time to time in the different Municipal Districts.

You can therefore expect to hear from one of these men within the next month or five weeks. If there are any special Weed meetings that you desire, I would be glad if you would advise this office direct. Or if there is any particular time that you would prefer one of these Supervisors to visit your council, kindly signify to us at your earliest convenience.

WEED INSPECTOR'S DIPLOMA COURSE

I beg also to draw your attention to a Weed Inspector's Diploma Course to be conducted by the Department at the University of Alberta, during the week of February 17th. We trust that you will give this course publicity, and that a number of men from your district will see fit to take this course which is intended to fit them for Weed Inspectors. If they complete the course satisfactorily a diploma will be issued them. There are no fees in connection with this course, and the only expense that candidates will be put to is railroad fare and room and board while in the city. Prospective candidates should advise this Branch as soon as possible.

Yours very truly,
W. J. Stephen,
Field Crops Commissioner.

Here and There

(451)
The total value of the principal field crops of Canada for 1929 is estimated at \$986,384,000, about \$40,000,000 less than in 1928.

Construction of the new steamer for the service between Saint John and Digby on the Bay of Fundy is well advanced and it is hoped to have it in operation by next August. Grant Hall, senior vice-president of the Canadian Pacific Railway, announced recently on a visit to the New Brunswick city.

Indicating western Canada's importance in the livestock world, 21 head of registered Aberdeen Angus cattle from Glenearnock Farm, famous breeding establishment operated near Brandon by Hon. J. D. McGregor, Lieutenant-Governor of the province, recently arrived at Vancouver by Canadian Pacific Railway for shipment to Australia and New Zealand.

Designed to furnish the immense tractive effort of 83,200 pounds, a new locomotive, first of its kind on this continent, to be operated on a high steam pressure principle, will be immediately placed under construction at the Angus Shops of the Canadian Pacific Railway. It will be one of the most powerful in the world and will supersede the 5,000 engine of the railway as the most powerful in the British Empire. Locomotive and tender will weigh 764,000 lbs. or 14,000 lbs. heavier than the 5900 engine and 120,000 lbs. heavier than the 2800 locomotive.

How one \$14,000,000 equipment contract given by the Canadian Pacific Railway to the National Steel Car. of Hamilton, during 1929, resulted in 122 business houses, located in four Canadian provinces, securing valuable supply orders and how this far-flung distribution of the company's contract provided steady work and wages for skilled mechanics and large office staffs over a period of months has been revealed by a study of statistics at the National Steel Car Co. and Canadian Pacific Railway.

T. A. Murphy, M.P. of Toronto, was a passenger on S.S. Montrose recently from Saint John. As an official of the Amateur Athletic Union of Canada, Mr. Murphy is on his way to Great Britain to make arrangements for the British Empire games at Hamilton next August, at which every part of the Empire will be represented by brilliant athletes.

What is regarded as one of the largest real estate transactions on record was made recently, when the Canadian Government reached agreements with the Provincial Governments of Manitoba and Alberta for the transfer to those provinces of their natural resources. These include large areas of land, forests, water powers, fisheries, mines, oilfields, etc., and represent a value in excess of a billion dollars. The agreement will be ratified by Parliament at its next session early this year.

The Wilder Silver Medal, one of the highest awards made by the American Pomological Society, has been given to W. T. Macoun, Dominion Horticulturist, for his work in breeding new varieties in apples and for his contribution to horticulture generally. Mr. Macoun has occupied the position of Dominion Horticulturist at the Canadian Government Experimental Farm at Ottawa for the past 41 years.

Mr. and Mrs. Roscoe Humphreys were Lethbridge visitors on Saturday.

A Trainload of Oliver-Hart-Parr Tractors Sold to Dealers of Southern Alberta

TWENTY-SEVEN YEARS AGO Hart-Parr built the first successful Farm Tractor. Then later perfected the first successful method of burning low-grade fuels.

Hart-Parr was the first company to refer to its product as a "Tractor," thus earning the proud title of

"FOUNDERS OF THE TRACTOR INDUSTRY"

TODAY the Three-Fuel-Surplus Powered Hart-Parrs have proven their ability to cope with Western conditions by their economical operating cost, long life, and accessibility.

Increased demands by farmers of Alberta for Hart-Parr Tractors require these tractors brought in by the trainload, and every tractor is sold before it leaves the factory. A trainload arrived in Calgary on Jan. 8th, and two carloads out of this train should arrive in Raymond on Monday or Tuesday of next week.
